

## BUD MURRAY'S CUSTOM CARVING KNIVES

**Bud Murray of Missouri has been making carving knives and tools for many years that have been well received in the carving community. He makes the Murray 529 Knife with the Universal Whittle-Carving Knife design fitted into his unique pistol grip walnut handle. The handle allows for a couple of holding positions that fit comfortably in the carver's hand. The tang of the blade extends out of the handle to allow for the index finger to wrap around that part of the blade while choking up on the handle for detail carving cuts.**
